

A box plot showing the distribution of the number of groups per individual across seven groups. The x-axis is labeled 'Groups' and ranges from 1 to 7. The y-axis represents the number of groups per individual, ranging from 0 to 10. The plot displays the median, quartiles, and range for each group, with individual data points overlaid. The distributions are generally centered around 5-6 groups per individual, with some variability in the range and median across the seven groups.
